

Quality is the principal guide to our actions to deliver services and products that are safe, compliant with requirements, and preferred. It is essential for our long-term vision to focus on continuously increasing value in our engineering services by improving technology in all our products with the objective to make Formula 1 battery technology available at scale.

Bold's core values are:

- **Customer obsession:** We are obsessed with delivering value to our customers through impeccable responsiveness, communication, and reliability.
- **Ownership:** We are eager to see projects through to completion. We go above and beyond to deliver on expected results.
- **Boldness:** We adopt a can-do attitude when facing new, unprecedented challenges and come up with innovative solutions to problems
- **Excellence:** We aim to become the best engineers. We are detail oriented; results driven and continuously look for improvement opportunities in everything we do.
- **Integrity:** We take a "people first" approach by respecting our colleagues and treating them fairly. We are ambassadors of our own brand. We are bound to confidentiality and meritocracy.
- **Continuous improvement:** Continuously challenging ourselves to improve the quality management system to guarantee product innovation, safety, prevent quality incidents, reduce the MUDAs on the process and eliminate defects through the review of quality objectives.

Top Management will create the necessary resources to secure Quality Management System and Quality Culture continuous improvement.

The Quality Policy is available to all BOLD Employees, and they are responsible for their application.
